Tiger Logistics Secures Large-Scale Solar Logistics Projects as Indian Solar Companies Ramp Up Module Production

New Delhi, India – July 28, 2025 – Tiger Logistics (India) Limited, a leading international logistics solutions provider, today announced the successful execution of multiple large-scale logistics projects, moving approximately 2 GW in a single project under its renewable energy vertical, TiGreen, to support India's fast-growing solar manufacturing sector.

India's push toward energy security and self-reliant solar manufacturing is creating a new class of logistics demand — specialized, capital-intensive, and time-bound. With shipment batch sizes of up to 200 containers executed successfully, these projects involved the end-to-end movement of high-value capital equipment from China to India, including specialized cargo for solar module manufacturing.

Key routes included shipments from Qinzhou, Wuhu, Shanghai, and Ningbo to Nhava Sheva, Mundra, Hazira, and Chennai, with a cargo mix comprising Flat Rack (Over-Width & Over-Height), 40' High Cube, 20GP, and Open Top containers. Despite challenges such as vessel space limitations, port congestion, container shortages, and stringent delivery timelines, TiGreen leveraged Tiger Logistics' strong command over the China-India trade lane, deep understanding of solar supply chains, experienced leadership in the solar sector, and extensive network of local agents and shipping line partners to ensure timely and disruption-free execution.

Commenting on the development, Mr. Harpreet Singh Malhotra, CMD of Tiger Logistics (India) Limited, said, *"TiGreen's performance reinforces our position as a trusted international logistics partner to the renewable energy sector. We are proud to play a catalytic role in powering India's clean energy mission through efficient and compliant international logistics solutions."*

As India accelerates its energy transition, TiGreen is well-positioned to capture the growing demand in the renewable energy supply chain. Our execution strengthens our leadership in renewable energy logistics and creates lasting value for shareholders. The company expects continued momentum in its RE vertical, driven by ongoing investments in solar infrastructure, trade lane optimization, and project logistics capabilities."

About TiGreen:

TiGreen's focus on renewable energy aligns with Tiger Logistics' broader vision of sustainable growth in the sector. To support the dedicated vertical's ambitions in the logistics of renewable energy, Tiger Logistics plans to invest further in people and technologies, as well as leveraging the expertise of the company in specific trade lanes.

About Tiger Logistics (India) Limited (BSE: 536264):

Tiger Logistics India Limited is a Bombay Stock Exchange-listed leading international logistics company and solutions provider, covering freight forwarding (air & ocean), defence & project logistics, transportation, and customs clearance. The company also launched its proprietary freight booking and management platform, "FreightJar", in 2023 to bring accessibility to competitive freight rates for SMEs/MSMEs and seamlessness to the freight booking and management journey. With a strong presence across the world, Tiger Logistics boasts over 24 years of experience in the automotive, renewable energy, engineering goods, yarns & textiles, pharmaceutical, consumer durables, commodities, building materials, defence & aerospace and FMCG industries, among others.

Founded in the year 2000 in response to a need for a reliable, high-principled player in the Indian logistics scenario and a goal to be a one-stop shop for international logistics, Tiger Logistics works with agents & partners across the board to deliver reliable, efficient, and timely cargo movement around the world. With an asset-light model and one-stop solution for customers for international trades, Tiger Logistics carves tailored solutions for its customers to manage their end-to-end logistics requirements, with cost innovation and personalized service at its core by working as a logistics partner instead of just a vendor.
